

# FeatherIM

# What is FeatherIM

1

“

“Decentralized light-weight  
P2P instant messaging and  
video chat over NKN  
blockchain network protocol”

# Features

## Fast!

Start videochatting with your colleagues, friends, and family immediately in any terminal! No more time wasted on using.

## Configuration

Maintain all your settings in a single `config.json` file. Never need to redo the setting every single time.

## Light-Weight!

ASCII powered video-compression for maximum data transmission savings.

## Multiple Colors

For better visibility, FeatherIM has a clean, beautiful color scheme that allows you to see videochat in more colors than you've ever seen at this scale.

## Secure!

Encrypt your conversations on FeatherIM with the NKN decentralized blockchain network ecosystem!

## Keybindings

You can expect common keybindings for FeatherIM. Customize `bindings.json` for your own liking!

# FeatherIM

Decentralized light-weight P2P instant messaging and video chat over nkn blockchain network protocol.  
Open-sourced and low-data overhead chat with an awesome videochat stream in ascii format aboard a shared internet.
